Filed : November 26, 2003

INTERVIEW SUMMARY

Applicant thanks the Examiner for the courteous interview conducted on April 9, 2007, and the helpful comments provided therein. In the Interview, it was agreed that the references of record did not appear to anticipate Claims 6 and 10 if these claims were amended to recite that the hydrofluoric acid concentrator contains a heating unit and spray nozzles to spray hydrofluoric acid water into the concentrator under reduced pressure, and that the hydrofluoric acid concentrator has surfaces that provide corrosion resistance to concentrated hydrofluoric acid.
